MEMORANDUM FOR THE RECORD

SUBJECT: Investigation-Viewing Systems Study

25X1 1. During the morning of Monday, 13 October 1969, the Project Officer visited the [] for the purpose of investigating the feasibility of conducting a Viewing Systems Study. This proposed study is a NPIC FY-70 Research and Development Project.

25X1 3. The Project Officer presented the basic idea behind the proposed study (see the Introduction paragraph of the Design Objectives), and asked the [] personnel to comment on the possibility of conducting such a project. The three [] personnel were unanimous in their opinion that such a study was feasible.

25X1 4. [] stated that the initial effort should be a minimum of one (1) man-year, a portion of which would be used to define the problem. He added that factors of manufacturing feasibility, performance, time to develop and cost would probably be worthwhile considering. The end product of the study was visualized as being a book with a capability of being updated.

25X1 5. [] advised that [] would be interested in performing the Viewing Systems Study.
